Dublin, Ireland | +353 831905637 | satvikkumar2101@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

High-performing MSc Business Analytics candidate (GPA: 3.95, 1st Class Honors) with a Computer Science background (9.08/10). Proven Data Analyst delivering 15% conversion uplift at Canverro. Expert in Python, SQL, and Predictive Modelling, seeking to apply analytical expertise to business problems.

EDUCATION

Master's in Business Analytics (GPA: 3.95, 1st Class Honors)

September 2025 - September 2026

University College Dublin, Dublin, Ireland

- **Key Grades:** Statistical Methods (A+), Optimisation in Business (A), Programming For Analytics (A)

Bachelor's in Computer Science (Grade: 9.08/10)

September 2020 - May 2024

SRM Institute of Science and Technology, Chennai, India

KEY SKILLS

Languages & Databases: Python, SQL (PostgreSQL/MySQL), Java, JavaScript, NoSQL.

Tools: Excel (Advanced), Power BI, Tableau, AWS, GitHub, Docker, Linux

CAREER EXPERIENCE

Data Analyst, Canverro, Bengaluru, India

June 2024 - February 2025

- Analysed customer transaction data to identify top-performing product lines, implementing changes that drove a 15% uplift in conversion rates.
- Designed and deployed automated dashboards tracking CTR, Bounce Rate, and AOV, reducing manual reporting time by 150+ hours annually (approx. 3 hours/week).
- Collaborated with cross-functional teams to translate raw behavioural data into actionable marketing strategies.

Research Intern, McGill University (Mitacs Globalink Research Scholar), Montreal, Canada

June 2023 - September 2023

- Programmed a mobile client browser extension to assist visually impaired users in interpreting graphical content.
- Integrated voice assistant, multi-sensory feedback, and haptic option into the iOS Safari browser utilising Swift.

R&D Intern, Samsung R&D Institute (Prism), Bengaluru, India

December 2021 - October 2022

- Engineered a system to stitch video frames, increasing the field of view (FOV) for event-based video content.
- Developed an interactive player to allow users to pan across the stitched frame and view different portions.

ACADEMIC PROJECTS

Customer Churn Prediction & Revenue Impact Analysis (Technology Stack: Tableau, XGBoost, Python, Scikit-learn) 2025

- Identified €556K revenue at risk and designed targeted retention strategy saving €389K annually using predictive analytics.
- Discovered month-to-month customers churn at 42% vs 2.8% for long-term contracts, driving strategic recommendations.
- Built executive dashboard translating 84.6% accurate ML model into actionable business recommendations.

UrbanEats Expansion Strategy (Business Analytics) | UCD Smurfit

2025

- Analysed 4 years of demand data (2021–2025) to solve operational bottlenecks where 27% of customers were being served by remote branches.
- Designed a 5-branch network expansion plan targeting high-demand, underserved regions with a €1.36M investment, delivering the project €220K under budget.
- Modelled future demand scenarios (Holt-Winters) to justify capital expenditure to the board.

Production of Alloys Optimisation (Linear Programming) | UCD Smurfit

2025

- Developed a constraint-based optimization model using Mosel to minimize production costs while adhering to carbon emission targets.
- Simulated multiple tariff scenarios (Brexit/EU trade policies) to determine the optimal raw material sourcing strategy.
- Reduced theoretical production costs by balancing material quality constraints against fluctuating tariff rates.

ACADEMIC LEADERSHIP

- **Tutor, Business Analytics | University College Dublin**

Jan 2026 – Present

Mentored undergraduates through end-to-end analytics projects, bridging statistical theory with business logic.

- **Academic Winner | SRM University**

May 2024

- **1st Runner-up | Ultron Hackathon**

April 2022
